## PROFILE

Front-End Developer with hands-on experience in building interactive and user-friendly websites. Developed multiple personal projects using HTML, CSS, and JavaScript, showcasing problem-solving skills and creativity. Proficient in responsive design and UI/UX principles, with a commitment to continuous learning. Eager to contribute to a professional team in developing modern web solutions.

## WORK EXPERIENCE

**Local Business Website Projects:**

- Developed a website for a local business as part of an academic project.
- Gathered requirements from the client and implemented solutions to enhance user experience.
- Integrated contact forms and a map for improved user interaction

**Personal Portfolio Development:**

- Created an interactive personal portfolio using modern web development technologies.
- Implemented responsive design to ensure compatibility across different devices.
- Showcased my projects and skills through practical examples.

**Thesis Project Development:**

- The project of the online medical application "Moj Lekarz" for managing the work of doctors and protecting the health of patients.
- Oversee market research to identify emerging trends, customer needs, and competitor strategies.
- Implementing responsive design principles to ensure optimal performance across various devices
